Master Halco announces new Monumental Iron Works™

ORANGE, Calif. — Master Halco, Inc., the world's leading distributor and manufacturer of fence systems, announced the addition of Monumental Iron Works™ to their extensive group of fencing solutions.

Monumental Iron Works™, or MIW, is a newly re-designed ornamental product line. Once only a regional favorite, MIW is now available with fast delivery to local Master Halco branch locations across North America. MIW panels are held to Master Halco's high quality standards, and are pre-assembled for fast installations.

MIW fences and gates bring a combination of aesthetic elegance and security to residential, commercial, industrial and institutional properties. Combining modern technology with traditional craftsmanship, Master Halco is able to offer a unique, modern ornamental solution with the look of fencing forged by the hands of master blacksmiths. The patented Pro-Arc™ brackets in the MIW system adjust for easy adaptations to all field terrain.

“MIW offers the benefits of a riveted system of components that are powder coated before assembly, plus, the panels are pre-assembled and ready for delivery from stock nationwide. Pre-assembled panels mean quicker installation time, and labor savings. MIW provides a high quality ornamental product at a mid level price.” said Beatrice John, MIW product manager for Master Halco.

Master Halco operates branch service centers, manufacturing plants and corporate offices from more than 60 locations strategically located across the U.S. and Canada. The company also operates the consumer resource web site FenceOnline.com. The Orange, Calif.-based corporation was founded in 1961. The company serves professional fencing contractors and quality building materials retailers throughout North America.
